NOVAONE TECHNOLOGIES

Customer Support Knowledge Base

Document ID: NOVA-KB-001 Version: 1.0 Last Updated: October 2026

Purpose: This document contains approved customer-support information for NovaOne Technologies. The information is intended to help support agents answer common customer questions. If a question cannot be answered from this knowledge base, follow the escalation rules.

1. Company Overview

About NovaOne

NovaOne Technologies is a fictional software company that provides cloud-based productivity and collaboration tools for small businesses, startups, and individual professionals.

Head Office

NovaOne Technologies, 45 Innovation Park, Bengaluru, Karnataka, India.

Support Hours

Customer support is available Monday to Saturday, 9:00 AM to 8:00 PM IST. Automated support is available 24/7.

Service Availability

NovaOne services are designed for high availability. Planned maintenance is announced at least 24 hours in advance whenever possible.

2. Products and Services

NovaOne Workspace

A cloud productivity platform that includes document management, team collaboration, task tracking, and shared workspaces.

NovaOne Drive

Secure cloud storage for documents and business files. Storage plans are available in 100 GB, 500 GB, and 2 TB options.

NovaOne Teams

A team collaboration service supporting channels, direct messages, file sharing, and project communication.

NovaOne Assist

An AI-powered support assistant that helps customers find information and troubleshoot common issues.

Business Plan

The Business Plan provides team administration, centralized billing, priority support, and advanced access controls.

3. Account and Login Issues

Forgot Password

Select 'Forgot Password' on the login page and enter the registered email address. A password-reset link is normally sent within 5 minutes. Check the spam or junk folder if the email is not visible.

Account Locked

An account may be temporarily locked after multiple unsuccessful login attempts. Wait 30 minutes and try again. If the account remains locked, contact customer support.

Change Email

Customers cannot change the primary account email directly from the dashboard. Submit an account-change request to support after completing identity verification.

Two-Factor Authentication

Two-factor authentication can be enabled from Settings > Security > Two-Factor Authentication. Supported methods include authenticator applications and email verification.

Unknown Login

If a customer notices an unfamiliar login, change the password immediately, enable two-factor authentication, and contact support for an account-security review.

4. Payments and Refunds

Payment Methods

NovaOne accepts major credit cards, debit cards, and supported online payment methods displayed at checkout.

Failed Payment

If a payment fails, verify card details, available funds, billing information, and bank restrictions. Customers may retry the payment after correcting the issue.

Duplicate Charge

If a customer believes they were charged twice for the same invoice, do not promise an immediate refund. Support must verify the transaction IDs before processing a correction.

Refund Policy

Eligible subscription refunds are reviewed on a case-by-case basis. Approved refunds are normally returned to the original payment method within 5–10 business days.

Invoice

Invoices can be downloaded from Billing > Invoices in the customer dashboard.

5. Orders and Subscriptions

New Subscription

Customers can purchase a subscription from the Plans page. The subscription becomes active after successful payment confirmation.

Upgrade

A customer can upgrade a plan from Billing > Manage Plan. Any applicable price difference is shown before confirmation.

Downgrade

Downgrades normally take effect at the next billing cycle unless the plan terms specify otherwise.

Order Status

Subscription and purchase status can be checked from Billing > Orders.

Missing Order

If payment was successful but an order is not visible after 30 minutes, provide the transaction reference to support for investigation.

6. Shipping

Physical Products

NovaOne primarily provides digital services. Physical promotional or hardware items, when available, are shipped only to supported locations.

Shipping Time

Standard shipping normally takes 5–8 business days after dispatch.

Tracking

A tracking link is sent to the registered email address once a physical order is dispatched.

Delayed Shipment

If a shipment is delayed beyond the estimated delivery window, contact support with the order number so the shipment can be investigated.

Incorrect Address

Customers should contact support immediately if an incorrect shipping address was entered. Address changes cannot be guaranteed after dispatch.

7. Cancellation

Subscription Cancellation

A subscription can be cancelled from Billing > Manage Plan > Cancel Subscription.

Effect of Cancellation

After cancellation, access normally continues until the end of the current paid billing period.

Immediate Cancellation

Immediate termination requests require support review and may result in loss of remaining service access.

Refund After Cancellation

Cancellation does not automatically guarantee a refund. Refund eligibility is determined according to the refund policy.

Accidental Cancellation

If a customer cancelled a subscription accidentally, contact support before the current billing period ends.

8. Technical Support

Application Not Loading

Check internet connectivity, refresh the page, clear browser cache, and try a supported browser. If the issue continues, collect the browser, operating system, timestamp, and error message.

Slow Performance

Check network connectivity and whether the issue occurs across multiple browsers or devices. Report persistent performance problems to technical support.

File Upload Failure

Verify file type, file size, internet connection, and available storage. Retry the upload after correcting any limitation.

API Issues

API customers should verify the API key, endpoint, request format, authentication headers, and response status code. Never request or expose a customer's secret API key in a support ticket.

Service Outage

If multiple customers report the same service failure, support should check the service-status dashboard and escalate the issue to the technical operations team.

9. Frequently Asked Questions

Q: How do I reset my password?

A: Use 'Forgot Password' on the login page and follow the reset link sent to your registered email.

Q: How long does a refund take?

A: Approved refunds normally reach the original payment method within 5–10 business days.

Q: Can I change my account email?

A: Yes, but the primary email change requires support review and identity verification.

Q: How do I download my invoice?

A: Go to Billing > Invoices in the customer dashboard.

Q: Can I cancel my subscription?

A: Yes. Go to Billing > Manage Plan > Cancel Subscription.

Q: Does cancellation give an automatic refund?

A: No. Refund eligibility is reviewed according to the refund policy.

Q: What should I do if I see an unknown login?

A: Change your password, enable two-factor authentication, and contact support.

Q: What if I cannot find my paid order?

A: Wait up to 30 minutes, then contact support with the transaction reference.

Q: Is NovaOne support available on Sunday?

A: Human customer support is available Monday to Saturday. Automated support is available 24/7.

10. Support Escalation Rules

Level 1 - General Support

Handle common questions about accounts, billing, subscriptions, orders, and basic troubleshooting using this knowledge base.

Level 2 - Technical Support

Escalate unresolved application errors, repeated upload failures, API problems, performance issues, and suspected service outages.

Level 3 - Security

Immediately escalate suspected account compromise, unauthorized access, credential exposure, suspicious transactions, or security incidents.

Billing Escalation

Escalate disputed or duplicate charges, refund disputes, and payment issues requiring transaction investigation.

Management Escalation

Escalate unresolved high-impact customer complaints, repeated service failures, or cases involving significant business impact.

When to Create a Ticket

Create a support ticket when the answer cannot be found in this knowledge base, when customer-specific investigation is required, or when an issue requires action by another team.

Information Required

Include customer ID, order/invoice number when applicable, issue description, timestamp, error message, steps already attempted, and relevant non-sensitive diagnostic information.

Security Rule

Never include passwords, API secret keys, authentication tokens, or other sensitive credentials in a support ticket.

Business Hours

Monday–Saturday, 9:00 AM–8:00 PM IST

RAG Usage Notes

This fictional knowledge base is intentionally organized into clear sections and short factual units so it can be chunked for retrieval-augmented generation. Example questions include: “How do I reset my password?”, “How long does a refund take?”, “Where can I download my invoice?”, and “What should I do if I see an unknown login?” Questions requiring customer-specific investigation or information not contained in this document should be routed to the support-ticket workflow.
